

SUB2201-BL

Compact passive 10" subwoofer,
black

The SUB2201 compact 10" passive subwoofer is designed to reproduce a smooth and punchy bass on a small footprint, offering 250 watts music power @ 4 ohms. The 6th order bandpass cabinet produces a dry yet deep bass using only a single 10 inch long stroke woofer.

Fill your bar, restaurant or shop with a full spectrum sound! The SUB2201 in combination with CHAMP-3D and MASK or OVO loudspeakers deliver a live sound experience which makes your trousers vibrate.

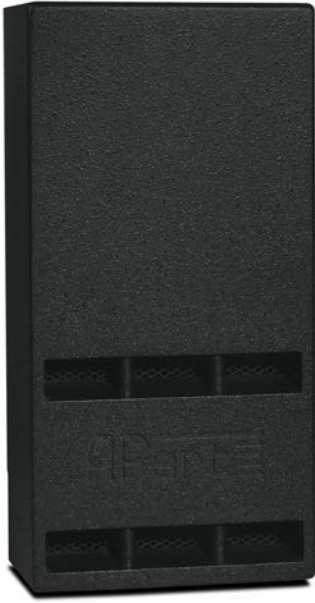

SUB2201 is built in plywood and has a structured paint finishing. The combination of its compact size and powerful bass allow you to put the subwoofer under a bench, in a corner or build it into furniture while still enjoying the vibes of a fat, kicking bass!

This subwoofer is equipped with a 35 mm metal pole mount adapter on top, allowing stands for placing top cabinets.
