## TT-15S1 PREMIUM TURNTABLE

Analogue purists behold: the TT-15S1 Premium Range turntable is here. It has a solid acrylic resin chassis in design style of the Premium Range, a 3 cm thick heavy acrylic platter with a black felt cover, solid aluminium feet, and state-of-the-art ceramic bearings, so it almost eliminates chassis resonance. The Marantz exclusive MM-system in a stylish ebony body is directly fixed to the high-grade audio interconnector reducing signal resistance to a minimum. Its anodised arm has been optimised to partner the unit perfectly. The motor is dampened and isolated from the chassis to prevent vibration influence. And a 'clever clamp' system ensures excellent disc contact with platter. The magnetic anti-skating system is contact-free to eliminate unwanted stylus stresses, and the continuous silicon belt guarantees rotational accuracy. The TT-15S1 represents the ultimate addition to any audiophile's home audio system.

### Highlights

Acryl chassis with massive aluminium feet

3 cm thick acryl platter

Ceramic bearing

Marantz exclusive MM system in ebony body

Direct wired system

Endless silicon belt

FEATURES	TT-15S1
Motor: AC/DC	• / -
