Listen to the radio without noise with DAB+

With the TUNA-NET 19", you can listen to the radio of thousands of stations worldwide in best quality. In addition to a conventional FM receiver, the device includes an Internet radio for noise-free reception of DAB+. Simply connect the TUNA to the Internet via WLAN or a LAN socket.

Easy operation

The TUNA can easily be controlled via the large jogdial or the supplied remote control. You can adjust the sound exactly to your ideas and your loudspeakers via various equalizer settings. You can connect an external amplifier or active speakers to the digital and analogue outputs; a headphone output is also available.

Transfer music with Bluetooth

If you don't like the radio program, simply use the Bluetooth function of TUNA to transfer music from your smartphone, for example.
